

## Cooking and heating with Moderna, the new collection of range cookers by J. Corradi

J. Corradi, historical Italian brand for top quality range cookers, launches a new collection characterized by a contemporary design, which combines endless cooking options with the possibility to heat using the most environmentally-friendly fuel found in nature: wood.

### Contemporary design and attention to details

Moderna's simple and linear design features a **chrome-plated aluminium frame**, which raises the entire structure from the ground and lightens it, and has **no sharp edges whatsoever**. Corners, doors and handles are bevelled and welded for better ergonomics and a great aesthetic effect.

### Excellent performance and beautiful flame

The firebox is in Alutec®, a material patented by MCZ Group, which whitens at high temperatures assuring a bright and attractive flame. The fire can be easily adjusted with a single control dial built into the compartment, and offers first-rate heating performance, **efficiently heating areas of up to 70-100 square metres**, according to the size of the model.

### Heating and cooking at the same time

While heating the surrounding area through natural convection, the firebox also heats the **top plate**, available in cast iron or in fiberglass, as well as the **wood-burning oven**, available with volume of 22, 41 or 51 litres, with thermometer and triple-glazed door for the utmost insulation and safety. The **stainless steel cooktop** increases the versatility of use of Moderna and it can be customised with gas or induction hobs, grills or fry tops.

### Materials and finishes

Chrome-plated aluminium frame and handles. The outer cladding is either in stainless steel or in red or black powder-painted steel. The sides are ventilated for easier recessed installation. The range cooker is available with steel feet or metal plinth.

### Variants

The collection includes:

- three wood-burning models measuring 60, 80 and 90 cm
- six combined wood-burning, gas, and electric models, measuring 120, 140, 150, 170 and 180 cm
- two models including only the gas and electric part measuring 60 and 90 cm

Launched at the end of February, during Progetto Fuoco 2018, **Moderna will be available in J. Corradi's stores from September 2018.**

**MODERNA 180LGE,  
the wood-burning range cooker combines with the gas and electric parts for the utmost versatility**

Combined range cooker which integrates firebox and wood-burning oven with the gas/electric part. Chrome-plated aluminium frame and handles. Outer cladding in stainless steel. Steel feet. On the left, cast iron top plate with removable rings for wood-burning cooking, firebox with internal refractory in Alutec® and lower compartment with a single control dial to adjust the flame. In the middle, 51 litre wood-burning oven with food warmer drawer underneath. On the right, customisable cooktop (with gas hobs, induction plate, cast iron grill, fry top), electric multi-function 110 litre oven with optional rotisserie, lower storage compartment.

**MODERNA 90L,  
the wood-burning range cooker perfect for recessed installation**

Wood-burning range cooker with oven. Chrome-plated aluminium frame and handles. Outer cladding in red powder-painted steel, with ventilated sides ideal to be recessed into existing units. Metal plinth. Top plate in cast iron with removable rings. On the left, firebox with internal refractory in Alutec® and lower compartment with a single control dial to adjust the flame. On the right, 51 litre wood-burning oven with food warmer drawer underneath.
