

MCZ GROUP NEWS 2018

WHY WE NEED TO CHOOSE TOMORROW'S HEATING SOLUTIONS TODAY

MCZ Group presents in 2018 new products that ensure **the highest levels of sustainability and efficiency**. Today, choosing a product from one of the Group's brands gives you the guarantee of **a future-oriented investment**, in full compliance with the strictest environmental standards.

By continuously investing in research and development, the company offers a full range of products that stands out for:

- **high environmental performance**, with heating solutions that comply with air quality requirements and with the strictest regulations; all of MCZ Group's products are certified according to the main EU standards, such as 7 étoiles Flamme Verte in France, BlmSchV Stufe 2 in Germany, VKF in Switzerland and Aria Pulita in Italy;
- **energy efficiency class A+ or A++**, which results in lower fuel consumption and greater savings;
- **availability of incentives** in many countries for purchasing high-performance stoves and fireplaces;
- compliance with the **EU Ecodesign 2022** directive, four years prior to its effective entry into force, which outlines specific eco-compatible design requirements for stoves and fireplaces.

Respect for the environment, energy saving, and much more. MCZ Group's products have always stood out for being highly **end-user oriented**, which is reflected in the following:

- extremely **easy** programming and daily use, including remotely through innovative systems;
- **less cleaning required**, thanks to larger ash drawers and new automatic scraping systems that prevent residue build-up, now available for an even greater number of products;
- an attractive and modern **design**, which also highlights the pellet flame.
