

CLUB, EGO, MUSA, STAR AND SUITE: THE BEST-SELLING STOVES TURN 10 YEARS OLD (AND DON'T LOOK IT)

First launched in 2009, MCZ's five pellet stoves Club, Ego, Musa, Star and Suite were an instant success among consumers and quickly became **best-sellers across Europe**. Today, 10 years after their market launch and thanks to the implementation of regular technological upgrades, they are still among the best-selling stoves in the MCZ collection.

The **simple design** of these models, which underwent only minor restyling in 2014, succeeded in **winning over consumers from different countries**. Ego and Musa are made of steel. Club, Star and Suite have ceramic cladding, the first two with a minimalist style, whereas the Suite model has a more classic style.

Each stove is available in **several versions** in order **to meet the most diverse heating requirements**, yet maintaining its own design. The Air versions are ideal for heating one room, whereas the Comfort Air® versions are ideal for heating two or more rooms. Finally, the Hydro Matic versions are hydro stoves which can heat the radiators of the entire house.

All models meet the high quality standards that are now distinctive of the entire MCZ pellet stove collection:

- certified clean combustion (Ecodesign 2022)
- **large and natural flame**, like a wood-burning fire
- **sealed structure**, which ensures efficiency and perfect air quality inside a home
- ceramic spark plug for **quick ignition** in three minutes
- **autonomous cleaning**, with a wide ash pan that is emptied weekly and a self-cleaning brazier for the more powerful versions (Hydro Matic and Comfort Air Matic)
- **high sound comfort** with the No-Air function, the option to totally disable ventilation or keep it to a minimum.

All models also come in the **Maestro** version, **one of the most innovative technologies developed by MCZ**. This built-in micro-computer constantly interfaces with the user's smartphone, for unrivalled stove performance. The Maestro models have a double Wi-Fi kit supplied as standard, so you can control your stove with your smartphone both at home and when you are out.

The technical data sheets of these stoves are provided below.

CLUB

Pellet stove with steel structure, ceramic top and sides (White, Sand, Black, Bordeaux). Cast iron brazier. Intelligent combustion management with Active+ or with Maestro technology and double Wi-Fi included.

As one of the most popular MCZ products, this stove is available in Air, Comfort Air® and Hydro Matic versions, all characterised by a broad and natural flame, sealed structure, weekly-emptying ash pan, ceramic spark plug for quick three-minute ignition.

AIR and Comfort Air® versions are also available with the smoke outlet on the top instead of the back, with sliding opening of the pellet tank. This allows for installation flush with the wall, which reduces the depth of the stove and, consequently, optimises space in the home.

SUITE

Pellet stove with steel structure, ceramic top and sides (Bordeaux, Old Amber, Salt&Pepper). Cast iron brazier. Intelligent combustion management with Active+ or with Maestro technology and double Wi-Fi included.

As one of the most popular MCZ products, this stove is available in Air, Comfort Air® and Hydro Matic versions, all characterised by a broad and natural flame, sealed structure, weekly-emptying ash pan, ceramic spark plug for quick three-minute ignition.

AIR and Comfort Air® versions are also available with the smoke outlet on the top instead of the back, with sliding opening of the pellet tank. This allows for installation flush with the wall, which reduces the depth of the stove and, consequently, optimises space in the home.

STAR

Pellet stove with steel structure, top and sides made of ceramic (Black, Bordeaux, Sand, White) or Serpentine stone. Cast iron brazier. Intelligent combustion management with Active+ or with Maestro technology and double Wi-Fi included.

As one of the most popular MCZ products, this stove is available in Air, Comfort Air® and Hydro Matic versions, all characterised by a broad and natural flame, sealed structure, weekly-emptying ash pan, ceramic spark plug for quick three-minute ignition.

AIR and Comfort Air® versions are also available with the smoke outlet on the top instead of the back. This allows for installation flush with the wall, which reduces the depth of the stove and, consequently, optimises space in the home.

MUSA

Pellet stove with steel structure, top and sides made of steel (Black, Bronze, Silver). Cast iron brazier. Intelligent combustion management with Active+ or with Maestro technology and double Wi-Fi included.

As one of the most popular MCZ products, this stove is available in Air, Comfort Air® and Hydro Matic versions, all characterised by a broad and natural flame, sealed structure, weekly-emptying ash pan, ceramic spark plug for quick three-minute ignition.

AIR and Comfort Air® versions are also available with the smoke outlet on the top instead of the back. This allows for installation flush with the wall, which reduces the depth of the stove and, consequently, optimises space in the home.

EGO

Pellet stove with steel structure, top and sides made of steel (Bordeaux, Dark, Inox, Silver, White). Cast iron brazier. Intelligent combustion management with Active+ or with Maestro technology and double Wi-Fi included.

As one of the most popular MCZ products, this stove is available in Air, Comfort Air® and Hydro Matic versions, all characterised by a broad and natural flame, sealed structure, weekly-emptying ash pan, ceramic spark plug for quick three-minute ignition.

AIR and Comfort Air® versions are also available with the smoke outlet on the top instead of the back. This allows for installation flush with the wall, which reduces the depth of the stove and, consequently, optimises space in the home.
